Mount
P/N: UHXMNT
NSN: pending

Dillon makes three External Beam Mounts for the UH-1 series utility helicopters. These simple, light weight "plug and play" designs allow for a variety of installation options depending on aircraft configuration. These mounts pick up factory installed hard points on the belly of the aircraft. They consist of two main support arms, cross beam, and between

one and three vertical post positions. Installation can be accomplished in a matter of minutes. The post pintle is a standard 2.25-inch and accepts the Dillon Vertical Arm.

Dillon UH-1 mounts are in service now and have had millions of rounds expended on them.
