# Naval Post Mount

For naval applications, the installation utilizes the MK16 Naval Post Mount. The post mount is simple, sturdy, and requires only 2' by 2' of deck or truck bed space, which means it can be installed just about anywhere.

The pintle of the Naval Post Mount is a standard 2.25-inch diameter pintle making this mount entirely compatible with the Dillon Vertical Arm.

The Naval Post Mount M134 is currently in service in the Force Protection role on board US Naval vessels and vessels of allied nations.

In the small boat arena, M134s are used by special operations forces aboard fast attack craft and RHIBS in the fire support role.

Naval Post Mount  
P/N: NAV-MK16  
NSN: pending
